## 1. Round 1

### 1.1 Reviewer 1

Date: 03 May 2023

Reviewer: The research excellently represents the effects of occupational therapy on stroke survivors. However, addressing the above points, particularly related to sample size, study design, and methodology, will enhance the study's robustness and contribute more significantly to the field.

The article would benefit from more detailed case studies to illustrate the points made.

The scope of the commentary could be more clearly defined in the introduction.

A more critical perspective on the successes mentioned would enhance the depth of the commentary.

Expand the discussion on the challenges faced during implementation and how they were overcome.

Consider integrating a broader range of perspectives from the global health community.

Addressing Cultural Sensitivity: More focus on the importance of cultural sensitivity in implementing global health interventions.

The author uploaded the revised document.

## 1.2 Reviewer 2

Date: 05 May 2023

Reviewer: This commentary offers a great overview of global health interventions in resource-limited settings. Enhancing the depth of analysis, including recent data, and focusing more on policy implications will make the article a more impactful resource for understanding and improving global health strategies.

Some sections, particularly those discussing technological innovations, need deeper analysis.

Compare the findings with other similar studies to highlight the unique contributions of this commentary.

Clarify the proposed future directions for global health interventions.

Achieve a better balance in discussing both the successes and challenges of these interventions.

Include more recent data and statistics to support the arguments made.

Elaborate on the policy implications of the findings.

Ensure consistency in the writing style and tone throughout the commentary.

Discuss the role of NGOs and other stakeholders more comprehensively.

The author uploaded the revised document.
