1. Round 1

1.1. Reviewer 1

Reviewer:

- **Title and Abstract:** Clear and concise, reflecting the study's content accurately.
- **Introduction:** Provides a solid background; could benefit from a brief discussion on the current gaps in Matrix therapy research.
- **Methodology:** Well-structured, but needs more detail on the participant selection process.
- **Results:** Clearly presented; consider adding more visual aids for better comprehension.
- **Discussion:** Effectively links findings with existing literature. Suggestion: expand on the implications for future research.
- **Conclusion:** Succinct and reflective of the study's findings.
- **Ethical Considerations:** Adequately addressed.
- **Overall Impression:** A well-executed study with minor areas for improvement.

Decision: Accept after minor revisions.

Authors uploaded the revised manuscript.

1.2. Reviewer 2

Reviewer:

- **General Overview:** The study offers a meaningful contribution to understanding the efficacy of Matrix therapy in enhancing resilience and reducing relapse among amphetamine dependents. The quasi-experimental design is appropriate, and the use of established measurement tools adds to the study's reliability.
- **Key Strengths:** The study is methodologically sound, presenting clear and significant results. The use of both pre-test and post-test assessments provides a robust analysis of the intervention's impact.
- **Areas for Enhancement:** The literature review could be expanded to include more recent studies. Also, a more detailed discussion on the potential limitations and how they might impact the findings would add depth to the study.
- **Recommendations for Revision:** Enhance the literature review, provide more detail on participant selection, and expand the discussion on study limitations and implications for future research.

Decision: Accept with minor revisions, contingent on addressing the suggested improvements.

Authors uploaded the revised manuscript.

2. Revised

Editor's decision after revisions: Accepted.

Editor in Chief's decision: Accepted.
