1.   Round 1

1.1   Reviewer 1

Date: 20 June 2023

Having thoroughly examined the content, I am pleased to inform you that, in my professional opinion, the paper is well-researched and contributes significantly to the field.

The editorial provides a comprehensive overview of the current research landscape and highlights the growing interest in harnessing the power of computing to enhance various domains. The author effectively explains the concept of artificial intelligence (AI) and its potential in revolutionizing sports medicine, particularly in the areas of injury prevention, training optimization, and post-injury rehabilitation.

Furthermore, the paper offers valuable insights into the benefits of utilizing AI techniques such as data analysis, pattern recognition, and experience-based learning to improve decision-making and problem-solving in sports medicine. The convergence of technology and medical care, as outlined in the manuscript, showcases the transformative impact AI can have on the field.

I am confident that this paper will be of great interest to the readership of this journal. The authors' inclusion of ethical considerations also adds depth to the discussion, emphasizing the importance of responsible AI implementation within the context of sports medicine.

Thank you for the invitation. I would like to congratulate the authors for this great work. I think that the paper merit being published in the New Asian Journal of Medicine.

1.3 Reviewer 3

Date: 27 June 2023

I read with a great interest the editorial entitled Analysing sports medicine: the emergence of artificial intelligence
The topic is very interesting. However, the paper need to be improved.
Here are my suggestions:
1.   Change the title as: Emergence of artificial intelligence in analysing sports medicine
2.   Add a short title
3.   Add key-words
4.   Add a table or a figure that resumes the editorial
5.   Acknowledge ChatGPT if it was used during the writing of this editorial
6.   Several sentences are lacking references (see the corrected version)
7.   Abbreviations misuse: see examples in the revised version of the paper
8.   Improve the section References: several references are incomplete (lack of journal names, issues, volumes, pages)
Ref 9. Delete this reference: preprint are not accepted
Ref 10, 13, 15: Issue, volumes, pages

2.   Revised

Editor's decision after revisions: Accepted.
Editor in Chief's decision: Accepted.
