## 1. Round 1

### 1.1. Reviewer 1

Reviewer:

The concept of social capital (Mellin & Weist, 2011) is mentioned but not fully explained. Include a definition and discuss its relevance in the context of school mental health collaboration.

Review the sentence structure throughout the paper. For example, the sentence "This letter aims to highlight the significance of enhancing collaboration between educational institutions and mental health services drawing on recent research and practical examples to underscore its necessity and potential benefits." could be split for clarity.

Authors revised the manuscript and uploaded the document.

### 1.2. Reviewer 2

Reviewer:

The paragraph on bullying (Hart & O'Reilly, 2020) should include specific examples of successful interventions and their outcomes to illustrate the benefits of a collaborative approach.

When mentioning Schley et al. (2017), detail the reflective practices used and how they directly impact the efficacy of school personnel in addressing mental health needs.

The conclusion reiterates the importance of collaboration but could be stronger by summarizing key findings and suggesting future research directions.

Authors revised the manuscript and uploaded the document.
