Psychology, University of Tehran, Tehran, Iran. javaheri.m@ut.ac.ir

### 1. Round 1

#### 1.1. Reviewer 1

Reviewer:

Expand the review to include a wider range of studies and theoretical perspectives on marital infidelity, marital conflict, and marital quality.

Provide more detailed justification for the sample selection, data collection procedures, and the choice of research instruments.

Elaborate on the statistical analysis, particularly how correlation and regression analyses were employed to draw conclusions from the data.

Offer a more in-depth discussion on how the findings align or diverge from existing literature, including potential psychological and social implications.

Address limitations more thoroughly, particularly those related to the sample's representativeness and the cross-sectional nature of the study. Suggest specific directions for future research.

Authors revised the manuscript and uploaded the document.

## 1.2. Reviewer 2

Reviewer:

Strengthen the theoretical underpinnings linking marital conflict and quality to attitudes towards infidelity.

Clarify the research design, including a more detailed description of the sampling strategy and ethical considerations.

Provide a clearer explanation of the data analysis methods, including why certain statistical tests were chosen and how they contribute to the research objectives.

Deepen the discussion section to explore the practical implications of the findings for counseling and marital therapy.

Discuss potential biases in data collection and analysis and the study's generalizability to broader populations.

Authors revised the manuscript and uploaded the document.

## 2. Revised

Editor's decision: Accepted.

Editor in Chief's (The editor) decision: Accepted.
