1. Round 1

1.1. Reviewer 1

Reviewer:

The current references are diverse but could benefit from more recent studies focusing on ageism and sexism, especially those conducted in the last two years. This will not only update the article's literature base but also enhance the relevance and immediacy of the discussion.

The letter could provide a brief overview of the methodologies employed in the studies cited, such as sample size and study design. This will allow readers to better assess the reliability of the evidence presented and understand how these studies inform the article's conclusions.

Authors revised the manuscript and uploaded the document.

1.2. Reviewer 2

Reviewer:

Suggest incorporating perspectives from other disciplines such as sociology or cultural studies to deepen the analysis of how societal norms and cultural contexts influence ageism and sexism.

Include one or two brief case studies to illustrate the real-world impact of ageism and sexism on older women's mental health. This can make the article more engaging and relatable to a wider audience.

Authors revised the manuscript and uploaded the document.
