1. Round 1

1.1. Reviewer 1

Reviewer:

Clarify and elaborate on the specific objectives of the study within the introduction to ensure readers fully understand the intent and scope of the research.

Provide explicit definitions for critical terms such as "spiritual wellbeing" and "marital conflicts" in the introductory sections to avoid ambiguity.

Some references are dated. Update these with recent studies to reflect current research trends and validate the study's relevance.

Highlight the specific gaps in previous studies more distinctly to justify the need for this study.

Include studies from related fields to broaden the theoretical foundation and contextual understanding.

Describe the randomization process more thoroughly to ensure the study's reproducibility and to confirm the elimination of selection bias.

Revise the manuscript for grammatical errors and improve sentence structure for better readability.

Authors revised the manuscript and uploaded the document.

1.2. *Reviewer 2*

Reviewer:

Provide statistical justification for the sample size chosen to enhance the credibility of the study's findings.

Elaborate on the inclusion and exclusion criteria for participant selection to enhance the understanding of the population studied.

Detail the procedures used in data collection to improve the transparency of the research.

Strengthen the section on measurement tools by discussing the validity and reliability of the instruments used in this context.

Include exact p-values and confidence intervals for all statistical tests to enhance the precision of the reported results.

Explicitly connect the results back to the original hypotheses and research questions.

Contrast your findings with previous research to highlight similarities and differences.

Enhance the flow of information between sections through better transitions, linking the study's sections more coherently.

Authors revised the manuscript and uploaded the document.
